PROFESSIONAL SUMMARY

AI & Data Science Engineer with a B.Tech degree (June 2026) and hands-on experience building end-to-end AI systems across NLP, speech recognition, machine translation, OCR, LLM-based architectures, RAG pipelines, and AI agent development. Author of two open-source AI projects addressing real-world healthcare and digital inclusion challenges. Certified by Anthropic, Google Cloud, and Dubai Future Foundation in AI. Seeking a Junior AI Engineer or Data Scientist role in the UAE.

TECHNICAL SKILLS

Programming: Python, SQL, R, Power BI

AI / ML Frameworks: TensorFlow, PyTorch, Hugging Face, Machine Learning, Deep Learning, NLP, Computer Vision

Specialisations: LLMs, Prompt Engineering, AI Agents, RAG, ASR, TTS, Machine Translation, OCR, Generative AI

Tools & Platforms: Flask, REST APIs, Docker, OpenCV, Pytesseract, Gradio, Groq API, Google Gemini API, OpenFDA API, SQLite, Git, GCP

EDUCATION

B.Tech — Artificial Intelligence and Data Science

Graduated: June 2026

MEA Engineering College, Perinthalmanna | APJ Abdul Kalam Technological University | CGPA: 7.7 / 10

CERTIFICATIONS

AI Fluency: Framework & Foundations | Anthropic | 2026

Introduction to Generative AI | Google Cloud | 2026

1 Million Prompts — Prompt Engineering for AI | Dubai Future Foundation & Dubai Centre for AI | 2026

PROFESSIONAL EXPERIENCE

Robotics & Automation Intern — Retechnox, Kozhikode

Jun 2025

- Completed structured online training covering robotics fundamentals including sensors, actuators, and system integration; built theoretical understanding of automation concepts and industrial applications.
- Studied core principles of robotics system architecture, signal processing, and component interfacing through coursework.

AI & Data Science Intern — STEM Robotics, Thiruvananthapuram

Jun 2024

- Implemented end-to-end ML workflows including data handling, preprocessing, feature engineering, and model deployment on real-world datasets.
- Strengthened analytical problem-solving skills in a professional technology environment, gaining exposure to production-grade AI workflows.

KEY PROJECTS

ORMA AI — Voice Assistant for Elderly Care

Jun 2026 – Aug 2026

Python | FastAPI | React | LLMs | ASR | TTS | Docker | NLP

- Built a voice-first AI assistant for elderly users with multilingual support (Malayalam and English), integrating speech-to-text, LLM-powered conversations, and text-to-speech using Python, FastAPI, React, and Docker.
- Implemented medicine reminder and adherence tracking, conversational memory, emergency detection, and caregiver support features.

TRIEM — Multilingual AI Voice Assistant for Tribal Communities

Dec 2025 – Apr 2026

Python | IndicConformer ASR | IndicTrans2 NMT | ParlerTTS | Groq Llama 3 | Google Gemini 1.5 | Flask | Docker | SQLite

- Built end-to-end multilingual AI voice pipeline: ASR → NMT → LLM reasoning via Groq/Gemini/Ollama fallback → reverse MT → TTS; implemented multi-model AI agent routing and RAG-based SQLite FAQ retrieval.
- Deployed via Flask REST API with Docker containerisation; served Santali-speaking tribal communities with no prior digital infrastructure.

GitHub: github.com/rzvn6660/Multilingual-AI

Medi-Fy — AI Medicine Information Chatbot (OCR & NLP)

Jun 2024 – Apr 2025

Python | OpenCV | Pytesseract OCR | NLP | Gradio | OpenFDA API

- Developed an AI chatbot extracting dosage, usage, and side-effect information from medicine label images using OCR and NLP pipelines, making drug information accessible to non-technical users.
- Integrated OpenFDA API for validated medicine data and designed an accessible Gradio interface optimised for elderly and visually impaired users.
- Addressed a key healthcare access gap by enabling local-language medicine label interpretation for patients with low digital literacy.
